

- Universal Wi-Fi repeater
- 1 x Ethernet port
- Dual-band Wi-Fi
- Wi-Fi EasyMesh*

RR-10 is a universal wireless signal repeater designed to extend wireless networks coverage and amplify Wi-Fi signal strength. The solution helps to eliminate blind spots and optimize the operation of your Wi-Fi network.

Wireless connection

RR-10 repeater provides high data rate due to the support for IEEE 802.11n/ac. The use of MIMO technology and internal antennas makes the RR-10 a universal solution for extending a home network and providing high-quality 4K multimedia transmission.

Advantages of EasyMesh* technology

- Network intelligence: a self-organizing and self-optimizing network collects information and responds to network conditions for maximum performance
- Efficient load balancing: allows devices to switch to a better connection and avoid interference
- Scalability: allows adding multi-vendor Wi-Fi EasyMesh access points
