MES3348

MES3348F

Ethernet Ring Protection Switching (ERPS) protocol provides fast convergence (less than 200 ms) of the network, that guarantees uninterrupted service.

The switches comply with CE requirements.

¹ Values are given for 1-way transmission.

² For each host in the ARP table, an entry is created in the routing table.

³ IPv4/IPv6 Unicast/Multicast routes share hardware resources.
